APP SCREENS · BLACK & GOLD

NUT SORT

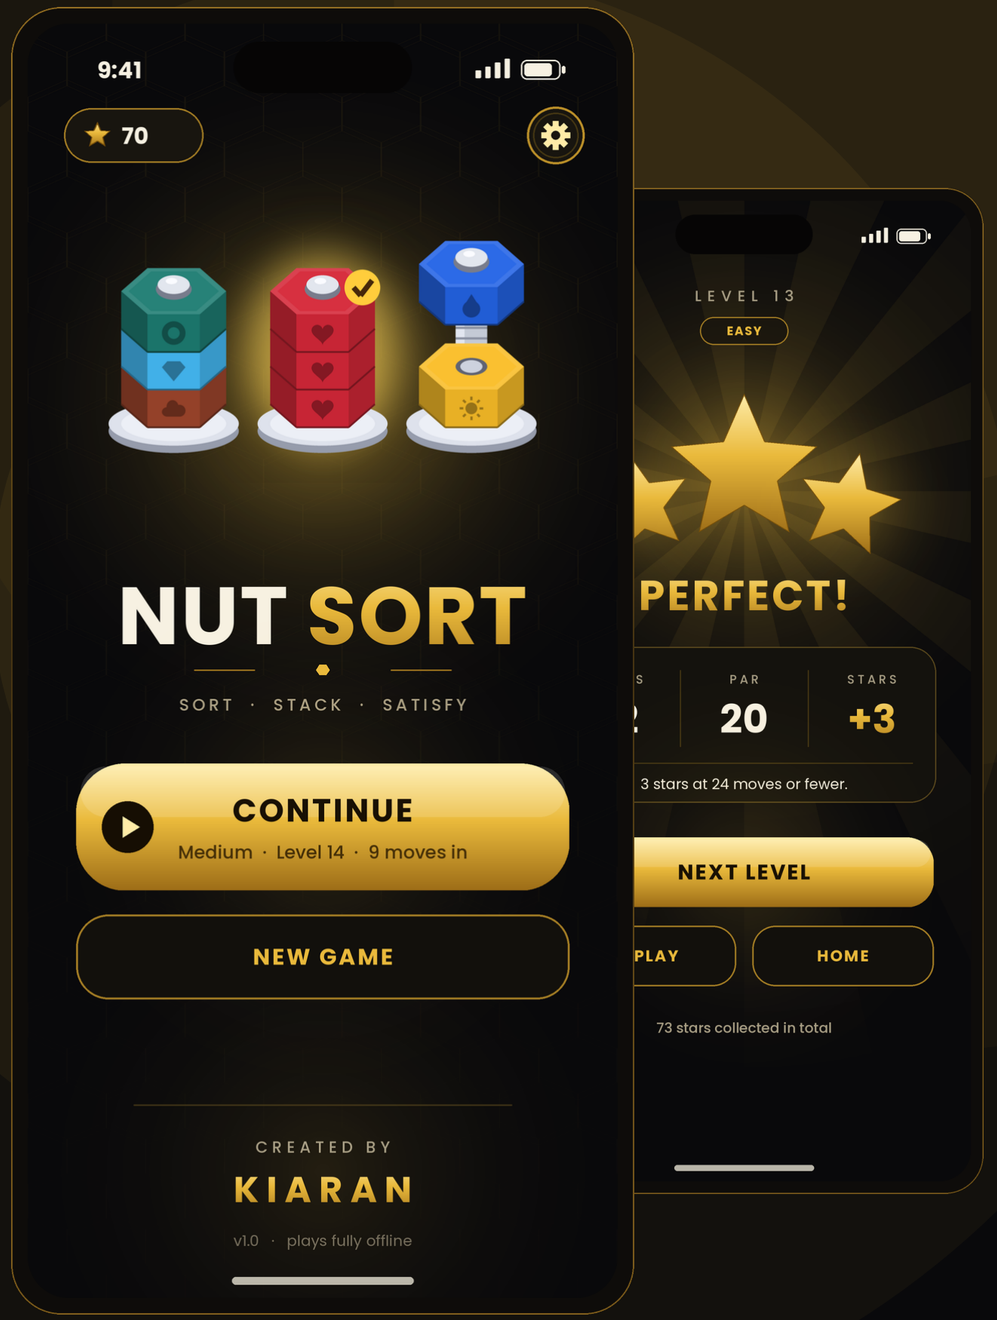

Every screen, **ready to build.**

Home · Difficulty · Levels · Stars · Settings

Original nut colours, unchanged. Everything else is now black and gold.

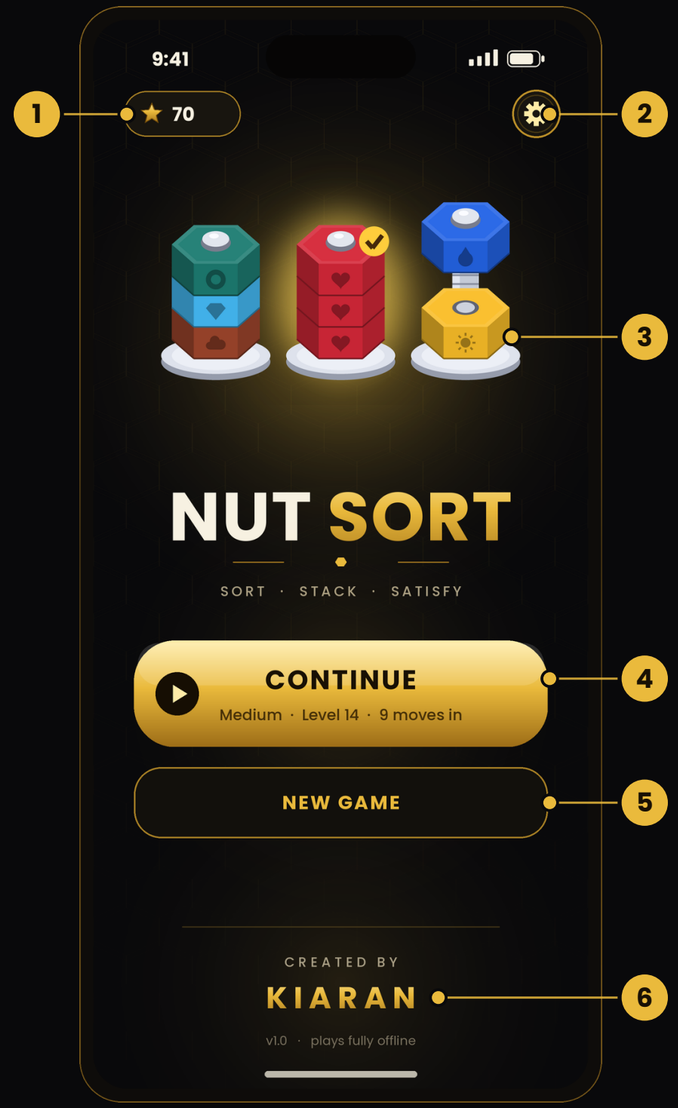

CREATED BY
Kiaran

All 13 screens in this PDF are mock-ups rendered from real game boards.

SCREEN 1 · HOME

A home page worth opening.

1 Star total

Every star you've earned, across all three difficulties.

2 Settings

Sound, music, symbols and reset.

3 Your nuts

A black and gold stage for the nuts. Their colours are untouched.

4 Continue

Only shows when a level is unfinished. It names the difficulty, level and moves so far, and drops you straight back in.

5 New game

Opens the difficulty chooser.

6 Creator credit

"Created by Kiaran" sits at the foot of the home page, and again in Settings.

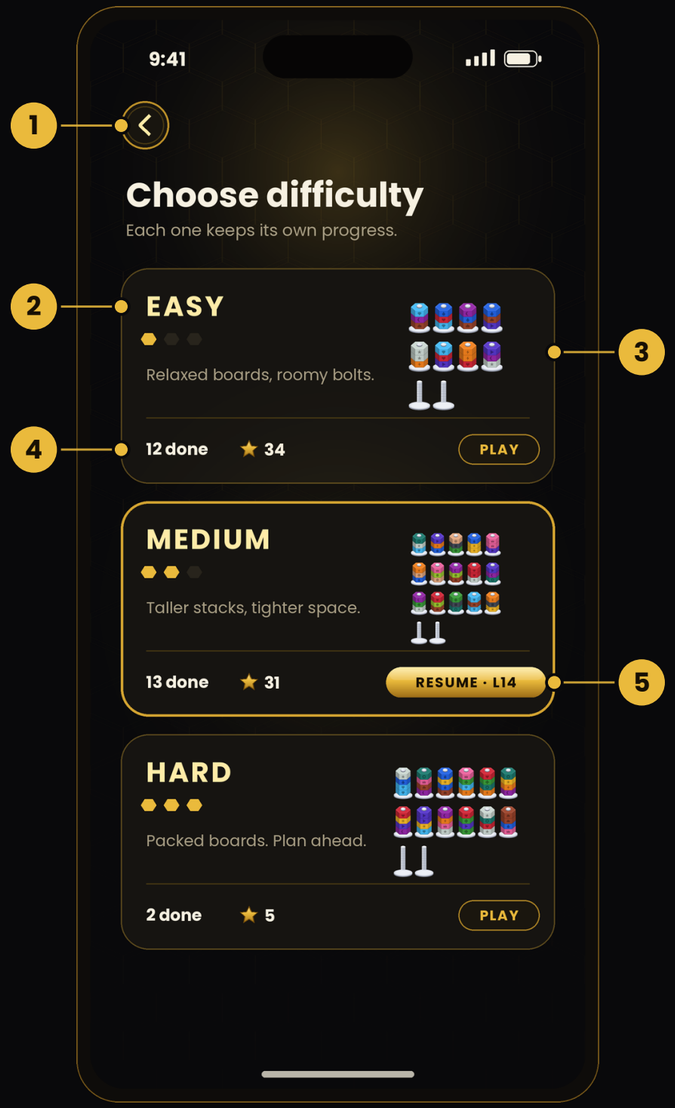

FIRST LAUNCH

No saved game yet, so the gold button is Play instead of Continue.

SCREEN 2 · CHOOSE DIFFICULTY

Pick a difficulty. Pick up where you left off.

1. **Back**
   Returns to the home page.
2. **Name and level of challenge**
   Three gold hexagons show how hard each one is.
3. **Real board preview**
   A thumbnail of the kind of board you'll get.
4. **Your progress**
   Levels done and stars earned, kept separately for each difficulty.
5. **Resume**
   The difficulty with an unfinished game gets a gold border and a Resume button.

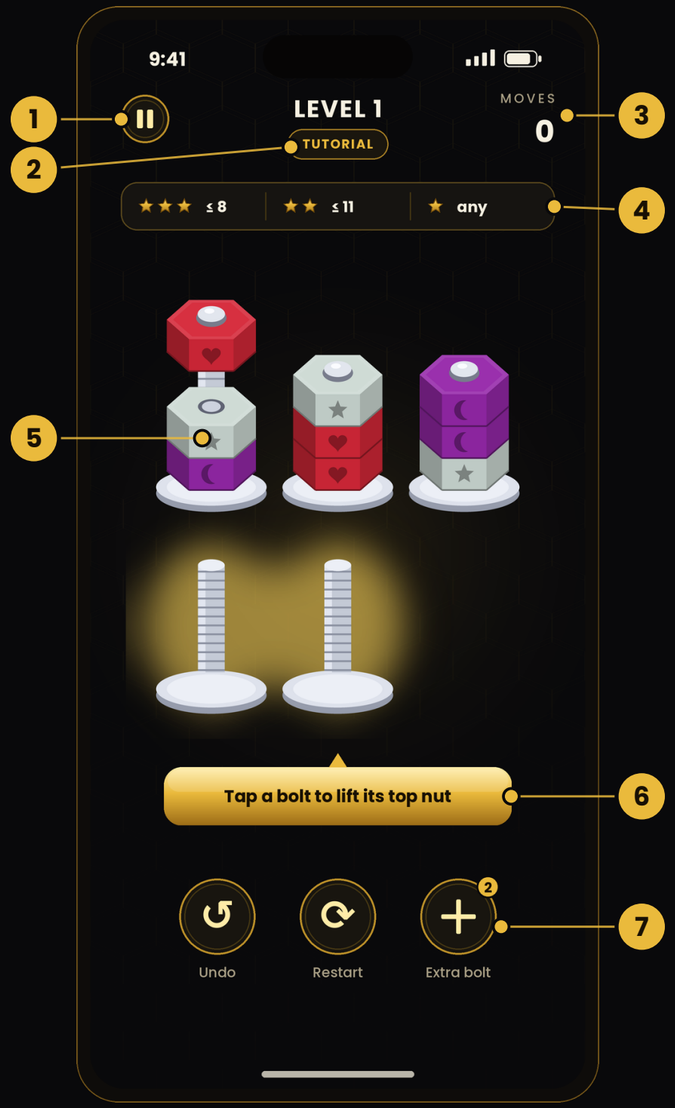

What changes between them

	Easy	Medium	Hard
Colours	4–10	7–15	10–18
Nuts per bolt	3–5	3–5	3–5
Bolts	7–12	10–17	12–20
Spare bolts	2–4	2–3	2

Ranges come from the 30-level ladders in the earlier pitch. Medium and Hard also vary the board shape (packed, balanced, tall and roomy).

SCREEN 3 · IN-GAME · TUTORIAL BOARD

A very simple level.

1. **Pause**
   Resume, restart, settings or home.
2. **Level and tag**
   TUTORIAL here; EASY, MEDIUM or HARD in play.
3. **Moves**
   Counts every move. Undo takes one back off.
4. **Star targets**
   3 stars at 8 moves or fewer, 2 stars at 11, 1 star for any finish.
5. **The board**
   Tap a bolt: its top nut lifts and every bolt it can go to glows gold.
6. **Hint bubble**
   Only on the first level. It disappears after your first move.
7. **Controls**
   Undo, Restart and an Extra bolt. The badge shows free bolts left.

Why a tutorial board?

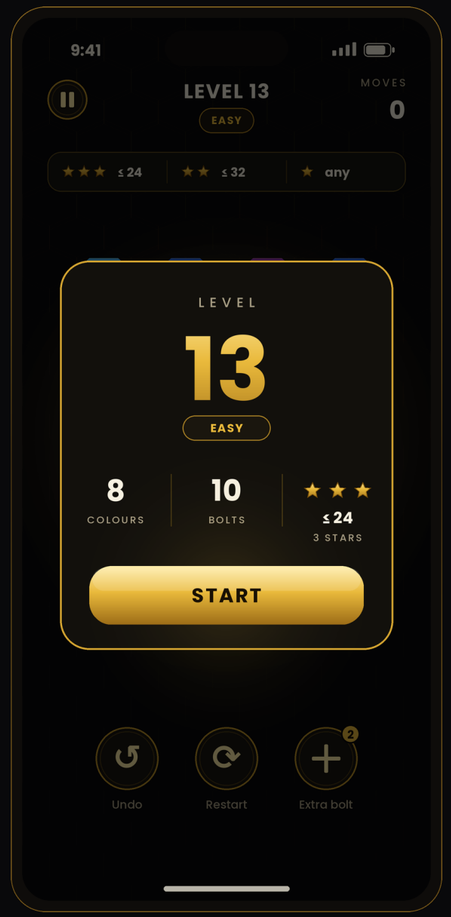

It has only 3 colours, so the very first thing you see teaches the rule in seconds. Your Easy ladder itself starts at 4 colours, so it never feels like a throwaway.

The one rule

A nut can go onto an empty bolt, or onto the same colour, if there's room. That's all.

SCREENS 4–6 · A LEVEL FROM START TO COMPLETION

Easy level: start, play, finish.

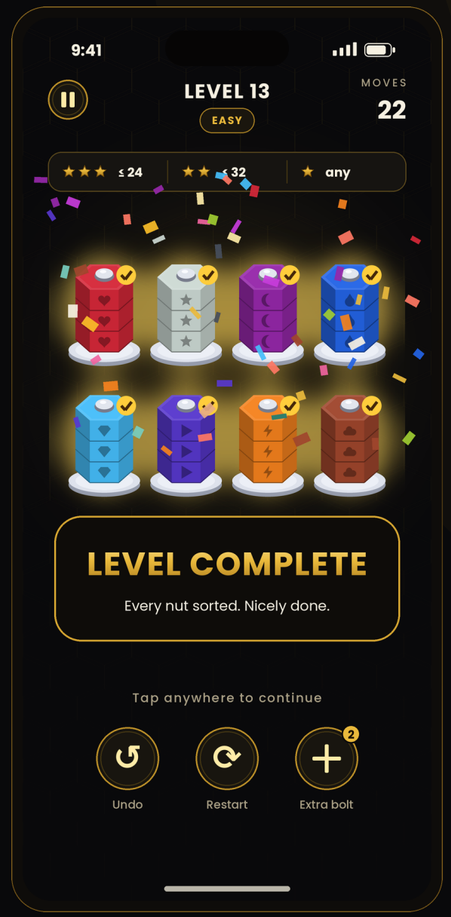

1 · Level intro

Level number, colours, bolts and the 3-star target. Tap START.

2 · Playing

The lifted nut and gold glow show where it can land.

3 · Complete

Finished bolts get a gold check. Confetti, then the star screen.

On Easy level 13

8 colours

10 bolts, 2 spare

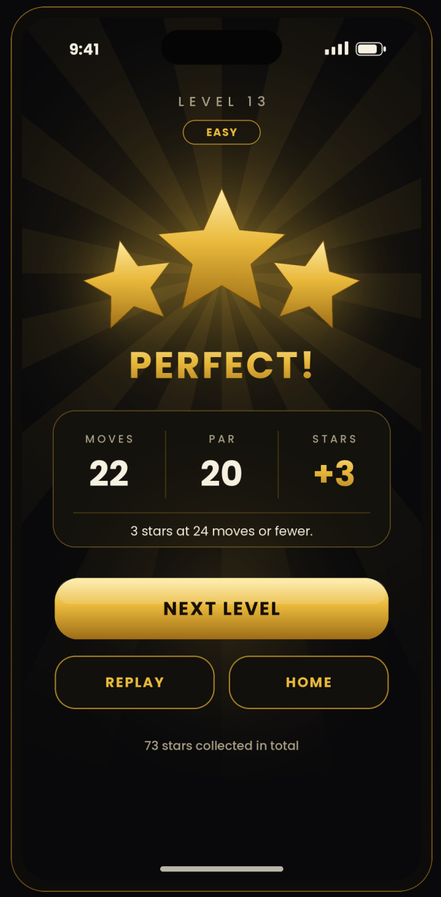

20 moves is par

Earn 3 stars in 24 moves or fewer.

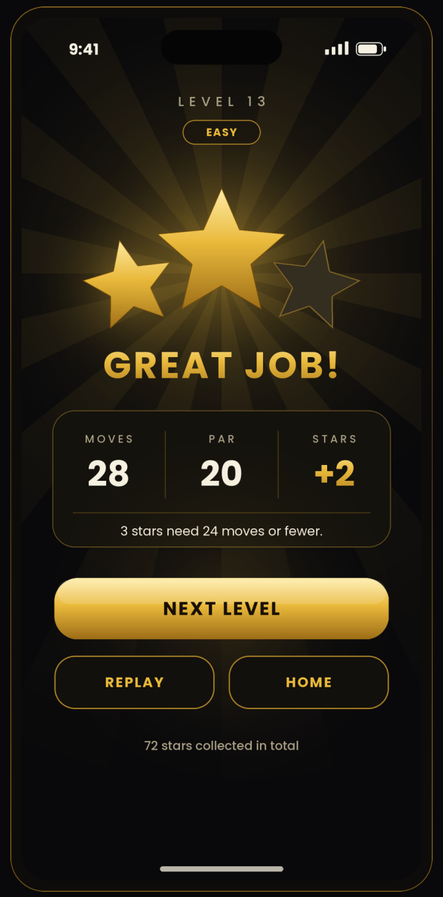

No timer. No penalties. Stuck? Undo, add a bolt or restart.

SCREEN 7 · RESULT

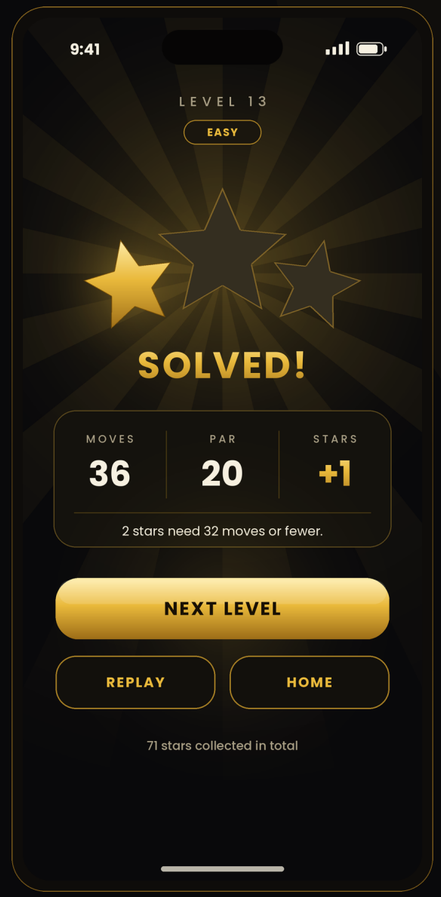

The star rating screen.

3 stars · 22 moves

2 stars · 28 moves

1 star · 36 moves

Same Easy level 13 each time. Par is 20 moves.

How stars are earned

within 120% of par
At par 20: 24 moves or fewer

within 160% of par
At par 20: 32 moves or fewer

any finish
At par 20: always

Par is the solution length for that exact board, found by my test solver. A sharp human can beat it.

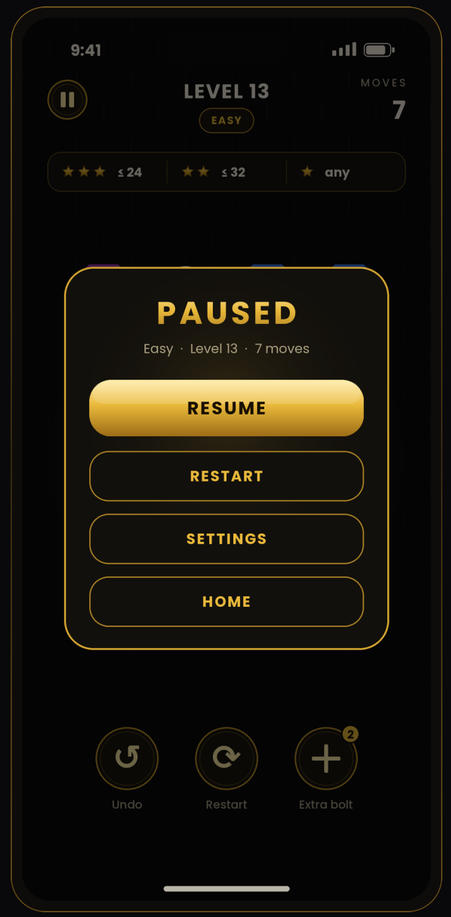

Undo removes the move from your count. There's no timer.

These percentages are a starting point. We'll tune them after you've played a few levels.

Buttons: NEXT LEVEL, REPLAY (to chase 3 stars), HOME.

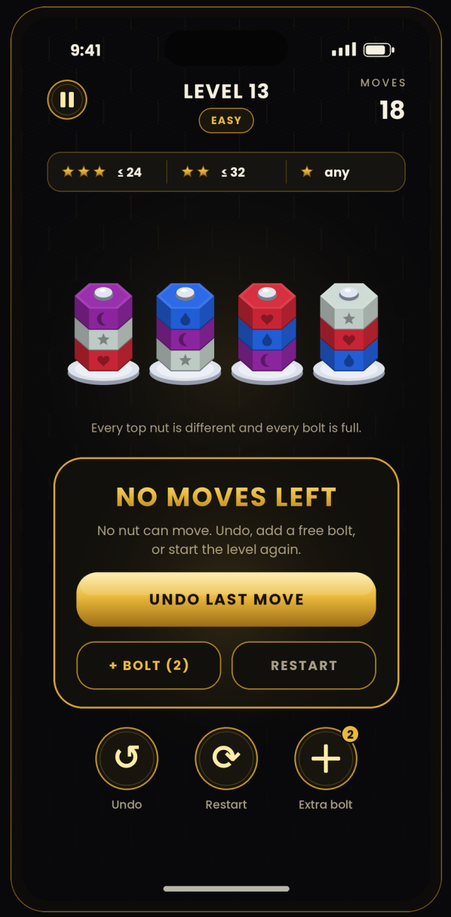

SCREENS 8–10 · THE REST OF THE INTERFACE

Pause, stuck and settings.

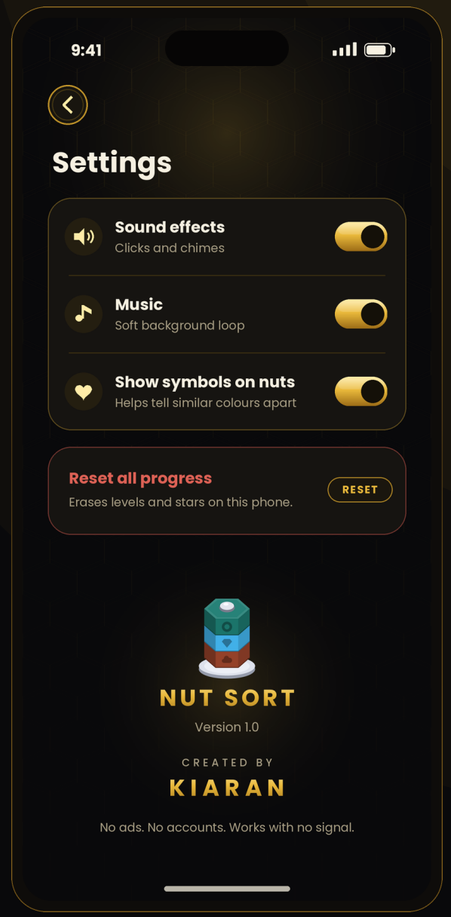

Pause

Resume, restart, open settings or go home. The board stays visible behind it.

No moves left

Appears on its own when nothing can move. Undo, use a free bolt or restart.

Settings

Sound, music, symbols on nuts and a reset. The credit to Kiaran is at the bottom.

NEW GAME

Buttons
Gold for the main action. Gold outline for everything else.

The 18 nut colours and symbols are unchanged

What's next

If these screens look right, say Go and I'll write the Claude Code starter prompt. It will use this PDF as the spec: screens, star rules, black and gold colours, offline Home Screen install and "Created by Kiaran".

Things you can change before then

- The name. It's Nut Sort for now.
- Star thresholds: 120% and 160% of par.
- Free extra bolts per level (shown as 2).
- Anything on a screen. Tell me which one.

Say "Go"
